

World Earth Day

Year 4

For World Earth Day, year 4 spent the day learning about deforestation and the importance of rainforests, here on earth.

We explored lots of different vocabulary which is associated with the rainforest and created a vocabulary tree to remind us of all the wonderful things it provides and reminds us of.

We debated whether deforestation was a good idea and looked at ways in which deforestation could be tackled.

To end the day, we looked at the technique of slash and burn and based our Art work to show how areas of rainforest look before and after this has happened.
