

World Earth Day – Year 6

We learned so much about the impact on our world when we disrupt the Carbon Cycle.

We enjoyed creating presentations about the impact the of carbon cycle on our world!

We learned that the word carbon comes from the Latin word 'carbo' which means coal. 30% of our atmosphere is made up of carbon dioxide.

We have also written some letters to our local MP Jess Phillip's to see if she can help with the problems caused when we disrupt the cycle.

What a great day!
